PROFESSIONAL SUMMARY

React JS & React Native Developer with 3.7+ years of experience building scalable, high-performance web and mobile applications. Strong expertise in JavaScript (ES6+), TypeScript, React.js, React Native (CLI), and modern component-based architecture. Experienced in developing responsive web applications and cross-platform mobile apps for Android and iOS, integrating RESTful/GraphQL APIs, implementing secure authentication flows, and optimizing performance. Proven ability to own features end-to-end, debug production issues, and manage deployments across Web, Play Store, and App Store environments.

TECHNICAL SKILLS

Frontend & Mobile Development

- React.js, React Native CLI (Non-Expo)
- JavaScript (ES6+), TypeScript
- React Hooks, Functional Components
- Redux, Context API, MobX (Familiar)
- Responsive Web Design & Cross-Platform Mobile UI

UI & Styling

- Chakra UI, Bootstrap
- Pixel-perfect implementation from Figma
- Mobile & Web UI/UX best practices

Backend & APIs

- RESTful APIs, GraphQL
- Axios / Fetch
- JWT & OAuth 2.0 Authentication
- Microservice-based architecture integration

Databases & Storage

- Firebase
- SQLite
- AsyncStorage

Native & Build Tools

- Android Studio, Gradle
- Xcode, iOS Signing & Build Process
- Webpack / Vite (Web builds)
- Native module integration & platform-specific debugging

Tools & DevOps

- Git, GitHub
- VS Code
- CI/CD exposure
- Agile / Scrum methodologies

Testing & Performance

- Debugging & Performance Optimization
- Production issue resolution
- Jest (Familiar)
- Crash monitoring & log analysis

PROFESSIONAL EXPERIENCE

Assistant Consultant – Software Developer

Expedien e-Solutions, Noida, India
July 2022 – Present

- Developed and maintained production-grade **React.js web applications** and **React Native mobile applications** for Android and iOS.
- Built reusable, scalable, and maintainable components using JavaScript (ES6+) and TypeScript.
- Owned features end-to-end — from requirement analysis and UI implementation to testing, optimization, and deployment (Web + Mobile).
- Integrated RESTful and GraphQL APIs along with third-party SDKs in microservice-based architectures.
- Implemented secure authentication and authorization using JWT and OAuth 2.0.
- Optimized application performance by reducing unnecessary re-renders and improving API efficiency.
- Debugged and resolved critical production issues across web and mobile platforms.
- Managed Android & iOS build processes, signing, store submissions, and web deployments.
- Actively participated in Agile/Scrum ceremonies, code reviews, and sprint planning.

KEY PROJECTS

Tax India – Tax Management Web Application (Web)

Tech Stack: React.js, Chakra UI, Context API, REST APIs

- Developed a scalable tax management web application using React.js with modular architecture.
- Built responsive UI components using Chakra UI ensuring consistency and accessibility.
- Managed global application state using Context API for authentication and role-based access.
- Integrated RESTful APIs for tax data management and dashboard reporting.
- Optimized rendering performance and improved API efficiency.

Genpedien AI – AI-Based Web Platform (Web)

Tech Stack: React.js, Chakra UI, Context API, REST APIs

- Developed a dynamic AI-powered web application using reusable React components.
- Implemented responsive UI layouts using Chakra UI with pixel-perfect design implementation.
- Used Context API for managing user sessions, AI responses, and global state.
- Integrated AI-based APIs for real-time response rendering and dynamic content updates.
- Improved performance by optimizing state updates and minimizing re-renders.

FilipinaLuv – Social Dating Platform (Web)

- Developed a React.js + TypeScript application using Chakra UI.
- Integrated OAuth-based authentication and REST APIs.
- Improved performance and reduced load times through API and UI optimization.

Punch Track – Employee Attendance System (Mobile)

- Built a React Native app with geolocation-based attendance.
- Implemented biometric authentication, GPS validation, and real-time tracking.
- Managed production debugging and Play Store / App Store deployments.

University Management Systems (LUVAS, MLSU, RTU, RPCAU) (Mobile)

- Developed scalable React Native applications for Android and iOS.
- Implemented attendance, grades, fee payment, and role-based access control modules.
- Ensured secure data handling and smooth store releases.

Hii5 – Student Social Media Platform (Mobile)

- Implemented real-time messaging and notifications using Socket.io.
- Built feeds, groups, and event management features.
- Optimized performance for high concurrent user traffic.

Bagal App – Service Marketplace (Personal Project – Mobile)

- Developed a React Native app connecting users with service professionals.
- Integrated Razorpay payment gateway, geolocation, and real-time tracking.
- Implemented live availability using Socket.io.

EDUCATION

Master of Computer Applications (MCA)
Madan Mohan Malaviya University of Technology
Gorakhpur, Uttar Pradesh | 2019 – 2022

ADDITIONAL INFORMATION

- Experience working in Agile / Scrum environments
- Familiar with Firebase, Push Notifications, and Crash Monitoring tools
- Strong ownership mindset and problem-solving skills
- Comfortable working independently and handling production responsibility
