Professional Summary

React Native Developer with around 4 years of experience building scalable cross-platform mobile applications for Android and iOS using React Native, JavaScript (ES6+), and TypeScript. Experienced in gathering and analyzing business requirements, designing reusable UI components, integrating REST APIs and third-party libraries, and implementing Redux, Redux Toolkit, Context API, React Hooks, React Navigation, Firebase, OAuth 2.0, JWT, Push Notifications, Google Maps, native Android/iOS integration, and performance optimization. Skilled in troubleshooting, debugging, code reviews, technical discussions, SDLC, and cross-functional collaboration. Experienced in leveraging AI tools such as ChatGPT and Claude for code generation, debugging, optimization, documentation, problem-solving, and improving development productivity.

Professional Experience

React Native Developer | Mobile Application Developer, *Expedien e-Solutions* 07/2022 – 05/2026
Noida

- Designed, developed, and maintained scalable React Native applications for Android and iOS using JavaScript (ES6+), TypeScript, React Hooks, and reusable components.
- Built responsive, pixel-perfect, high-performance mobile UIs using reusable React Native components for Android and iOS.
- Integrated REST APIs, Firebase, Google Maps, OAuth 2.0, JWT, Push Notifications, Geolocation, and third-party libraries.
- Collaborated with stakeholders, backend, QA, and UI/UX teams to gather and analyze requirements and deliver features using SDLC and Agile/Scrum.
- Built reusable React Hooks, functional/UI components, and state management using Redux, Redux Toolkit, and Context API for scalable mobile application architecture.
- Optimized application performance, responsiveness, and scalability using React.memo, useMemo, useCallback, FlatList optimization, lazy loading, image optimization, and render optimization.
- Resolved production issues, crashes, API issues, third-party dependency conflicts, performance bottlenecks, and platform-specific bugs.
- Used Git/GitHub for version control, branching, pull requests, and peer code reviews.
- Managed Android/iOS release builds using Android Studio, Gradle, and Xcode for Play Store and App Store deployment.
- Implemented biometric authentication using device-level security for secure user verification.
- Applied secure coding practices for authentication, APIs, local storage, and sensitive data protection.
- Independently analyzed technical issues and contributed to scalable solution design.

Education

Master of Computer Applications (MCA), 2019 – 2022
Madan Mohan Malaviya University of Technology, Gorakhpur

Bachelor of Science (B.Sc.), *Veer Bahadur Singh Purvanchal University* 2016 – 2019

Technical Skills

Mobile Development
React Native, React Native CLI , React.js, Android, iOS, React Navigation

State Management
Redux Toolkit, Redux, Context API, React Hooks

Native Mobile Development
Android SDK, Kotlin, Native Android Modules, iOS SDK, Swift, Platform-Specific Development, Third-Party Library Integration

Tools & Platforms
Android Studio, Xcode, VS Code, Postman

Testing & Debugging
Jest, React Native Testing Library, Unit Testing, Component Testing, Debugging, Troubleshooting

Version Control & Devops
Git, GitHub, GitHub Actions, CI/CD Pipelines, Pull Requests, Branching Strategies

Programming Languages & Ecosystem
JavaScript (ES5/ES6+), TypeScript, HTML5, CSS3

API Integration
REST APIs, API Integration, Axios, Fetch API, Socket.IO, JSON

Authentication & Storage
OAuth 2.0, JWT, Firebase Authentication, Biometric Authentication, AsyncStorage, SQLite, Offline Storage

Deployment
Google Play Store, Apple App Store, Mobile Release Management

Architecture
Mobile Application Architecture, Component-Based Architecture, Reusable Components, Clean Code, Performance Optimization

AI & Development Tools
ChatGPT, Claude, GitHub Copilot, Cursor AI

Key Projects

eCare Therapy – Mobile Application
Technologies: React Native, REST APIs, Firebase, Redux Toolkit,
- Developed and maintained a React Native teletherapy application using REST APIs, Firebase, Redux Toolkit, Socket.io and React Hooks.
- Integrated OAuth 2.0, Push Notifications, and third-party libraries.
- Built appointment booking, profile management, and responsive UI while improving application performance.

Punch Track – Attendance Management App
Technologies: React Native, Geolocation, Firebase, REST APIs, Context API
- Built a GPS-based attendance application using React Native, Firebase, REST APIs, and Context API.
- Integrated geolocation, role-based access, Push Notifications, and third-party libraries.
- Optimized rendering performance for large datasets.

University Management System (MLSU, RPCAU, LUVAS, CRSU)
Technologies: React Native, REST APIs, Context API, Firebase
- Developed enterprise modules for attendance, leave, payroll, academic records, and profiles.
- Integrated REST APIs and Context API.
- Optimized application performance for large datasets.
