Professional Summary

React Native Developer with approx 4 years of experience building high-performance cross-platform mobile applications for Android and iOS using React Native, JavaScript (ES6+), and TypeScript. Experienced in React Navigation, Redux Toolkit, Context API, REST APIs, Firebase, OAuth 2.0, Push Notifications, Socket.io, native Android (Kotlin) and iOS (Swift) integrations, and performance optimization. Skilled in delivering production-ready features, collaborating with product managers, designers, and backend engineers in Agile environments, conducting code reviews, and publishing applications to Google Play Store and Apple App Store. Familiar with GraphQL, Jest, React Native Testing Library, CI/CD, and modern software engineering best practices.

Professional Experience

React Native / Frontend Developer, *Expedien e-Solutions* 07/2022 – 05/2026
Noida

- Developed and maintained scalable **React Native applications** for Android and iOS following reusable component architecture and clean coding practices.
- Built responsive mobile UIs with React Native components while ensuring consistent performance across multiple screen sizes and devices.
- Integrated **RESTful APIs**, Firebase services, OAuth 2.0 authentication, Push Notifications, Geolocation, and third-party SDKs.
- Collaborated with backend developers, QA engineers, product managers, and UI/UX designers throughout the Agile software development lifecycle.
- Implemented reusable custom hooks, state management using Redux Toolkit, Redux, and Context API.
- Worked with **native Android (Kotlin)** and **iOS (Swift)** modules for platform-specific functionality.
- Optimized application performance using React.memo, useMemo, useCallback, FlatList optimization, lazy loading, and image optimization.
- Participated in **code reviews**, debugging, bug fixing, secure coding practices, sprint planning, and technical documentation.
- Used **Git** for version control and collaborated through pull requests and branching strategies.
- Supported application deployment through **Google Play Store**, **Apple App Store**, and basic **CI/CD pipelines** using GitHub Actions.
- Assisted junior developers through knowledge sharing and technical guidance.

Education

Master of Computer Applications (MCA), 2019 – 2022
Madan Mohan Malaviya University of Technology, Gorakhpur

Technical Skills

Mobile Development
React Native, React.js, Android, iOS, Expo

State Management
Redux Toolkit, Redux, Context API, React Hooks

Native Mobile Development
Native Modules, Android SDK, iOS Integration, Platform-specific Development, Third-party Library Integration

Tools & Platforms
Android Studio, Xcode, VS Code, Postman, Flipper, GitHub Copilot

Testing & Debugging
Jest (Basic), React Native Testing Library (Basic), Debugging, Unit Testing Basics

Version Control & Devops
Git, GitHub, GitHub Actions (Basic), CI/CD Basics

Programming Languages & Ecosystem
JavaScript (ES6+), TypeScript, HTML5, CSS3, Kotlin (Basic), Swift (Basic)

API Integration
RESTful APIs, Axios, Fetch API, Socket.io, JSON, GraphQL (Basic), WebSockets

Authentication & Storage
OAuth 2.0, JWT, Firebase Authentication, AsyncStorage, SQLite

Deployment
Google Play Store, Apple App Store, Mobile Release Management

Architecture
Component-based Architecture, Reusable Components, Clean Code, SOLID Principles (Familiar), Performance Optimization

Key Projects

eCare Therapy – Mobile Application
Technologies: React Native, RESTful APIs, Firebase, Redux Toolkit,
- Developed and maintained a React Native teletherapy application using REST APIs, Firebase, Redux Toolkit, Socket.io and React Hooks.

• Integrated OAuth 2.0, Push Notifications, and third-party libraries.
• Built appointment booking, profile management, and responsive UI while improving application performance.

Punch Track – Attendance Management App
Technologies: React Native, Geolocation, Firebase, Restful APIs, Context API
- Built a GPS-based attendance application using React Native, Firebase, REST APIs, and Context API.
- Integrated geolocation, role-based access, Push Notifications, and third-party libraries.
- Optimized rendering performance for large datasets.

University Management System (MLSU, RPCAU, LUVAS, CRSU)
Technologies: React Native, Restful APIs, Context API, Firebase
- Developed enterprise modules for attendance, leave, payroll, academic records, and profiles.
- Integrated REST APIs and Context API.
- Optimized application performance for large datasets.

Tax India – Web Application
Technologies: React.js, Rest APIs, Material Ui , Redux Toolkit
- • Developed responsive React.js user interfaces using Redux Toolkit.
- Integrated REST APIs and improved workflow efficiency.
